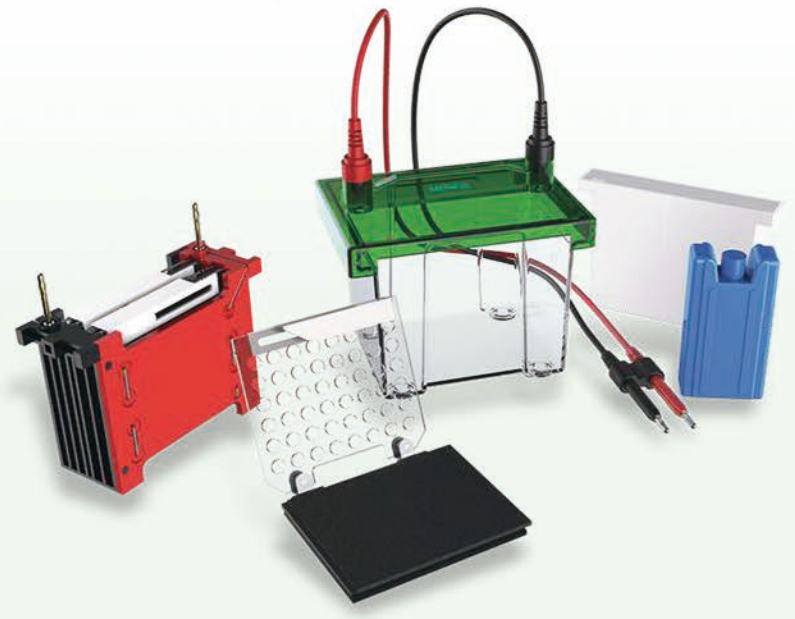
Protein & Transfer Electrophoresis

FL-ZY02



- FL-ZY02 Transfer Electrophoresis Tank

Features

- The tank is integrally injection-molded from highly transparent polycarbonate, featuring impermeability and impact resistance.
- The 4 cm spacing between positive and negative electrodes generates a strong electric field for efficient protein transfer; 99.99% high-purity platinum electrodes.
- Special open-style sandwich gel cassettes.
- Supports simultaneous transfer of two 83 × 73 mm gels.
- Compatible with FL-300 basic power supply.

Technical Parameters

Effective transfer gel area	110×90 mm
External dimensions	16×11.5×15 cm
Buffer volume	900 mL

Standard Configuration

Name	Unit	Quantity
Upper Cover of Electrophoresis Tank (with wires)	SET	1
Lower Housing of Electrophoresis Tank	PC	1
Transfer Core	SET	1
Sandwich Transfer Clamp	PIECE	2
Ice Box	PC	1
Cold Ice Box / Reusable Ice Pack Box	PC	2
Bubble Roller	PC	1
